INTEGRATED TECHNOLOGY SOLUTIONS FOR MANUFACTURING

Manufacturers need to be connected across multiple locations to factory equipment, employees and supply chain partners. Maintaining efficient operations, driving innovation, requires access to the latest technologies.

Effective data and communications networks accelerate decision-making, integrate systems and reduce costs through more efficient operations. The connected factory keeps all its assets – people, machines, tools, locations and warehouses – plugged in and accessible.

Expert tools and support from BCS allow you to gain insight into operations, leverage the latest technology expertise, keep data secure, and keep communications flowing between people and sites.

CHALLENGES.

Our solutions address your priorities of competitiveness, efficiency, and reducing downtime.

- Visibility into factory operations driving productivity with automation.
- Pervasive wireless access that improves output and lowers cost
- Connecting internal and external supply chain partners seamlessly.
- Confidence that data and communications are secure and backed up.

SOLUTIONS.

BCS' comprehensive managed technology solutions evaluate, build, deploy, and support your critical infrastructure.

- ASSESS: Objective reviews and audits of existing technologies and methodologies

- ARCHITECT: Our roadmaps for network infrastructure, communications systems, and hosted cloud platforms cover current and future needs

- OPTIMIZE: BCS streamlines networks and infrastructure to lower costs and increase revenue

- IMPLEMENT: We use our deep technical expertise to install solutions correctly and cost efficiently

- SUPPORT: Customers are our top priority. Our 24/7 help desk for network and end-user support provides rapid-response teams to fix problems quickly

INTEGRATING TECHNOLOGY SOLUTIONS

Voice | Data | Video | Wireless | Cloud | Security

TECHNOLOGY ROADMAPS.

Our custom technology roadmaps maximize your return on today's technologies and provide insights into the technologies that will impact your business' future.

We deliver comprehensive technology solutions that address critical needs. Keep your data secure, communications fully operational, and systems upgraded, maintained, and ready to support your operations. Our U.S.-based engineering teams are BCS employees, not outsourced staff, giving you access to highly trained talent ready to serve.

BCS has years of experience working with manufacturing companies. We understand the complex operations and the need to use technology to innovate. We deliver:

- **Cost reduction.** Increase productivity, reduce operational expenses with 24/7 technology support.

- **Multi-location support**. Support for manufacturing operations across multiple locations in North America and Europe. 24/7/365 support via a U.S.-based helpdesk.

- **Visibility.** Our tools and support solutions give you a holistic real-time view of systems and operations.

- **Communication system management.** Keep voice, data, video, telepresence and presentation communications up and running across multiple locations.

- **IT security.** Protect systems with secure comprehensive, multilayer protocols, including compliance with security guidelines for government subcontractors.

- **Data safety**. Secure data via monitoring tools, data leakage detection, and advanced encryption.

ABOUT BCS.

BCS offers end-to-end managed technology solutions. We understand your unique operational needs and provide customized solutions. We develop long-term relationships, providing systems and technology infrastructure that scale with your growth.

We create cost-effective, seamless solutions that keep your employees, partners and customers well connected.

BCS is more than a technology solutions provider: We are a partner to help drive your business goals.
