

## INTEGRATED TECHNOLOGY SOLUTIONS FOR LIFE SCIENCE

Pharmaceutical and medical technology companies face complex challenges. Rapid growth, increased regulatory scrutiny, and global scope require reliable networks and communications. Companies must keep employees, partners, and vendors connected and coordinated. Internal IT and engineering teams are challenged to build and support a rapidly evolving infrastructure. Keeping up with emerging technologies is even more daunting. BCS services can keep your technology systems running smoothly, ensure regulatory compliance allowing you to focus on your business.

### CHALLENGES.

Our solutions address your top technology priorities:

- Compliance. You need tools to automate, document and report on compliance to standards set by US, international agencies, industry guidelines, and investors.
- Innovation. Technology is evolving at a breakneck pace. To drive innovation you need access to and knowledge of the latest technology trends.
- Market pressures. The global marketplace means launching and supporting products worldwide. Mergers, acquisitions and partnerships require integration without delay. Growth and expansion on demand along with an infrastructure to support users in markets around the world.
- Collaboration. Providers, systems, insurers, and Partners expect shared access to data and insights. These partnerships require high-performance systems for communication and seamless integration.

### SOLUTIONS.

BCS' comprehensive managed technology solutions evaluate, build, deploy, and support your critical infrastructure.

- **ASSESS**: Objective reviews and audits of existing technologies and methodologies
- **ARCHITECT**: Our roadmaps for network infrastructure, communications systems, and hosted cloud platforms cover current and future needs
- **OPTIMIZE**: BCS streamlines networks and infrastructure to reduce costs and increase revenue
- **IMPLEMENT**: We use our deep technical expertise to configure solutions correctly and cost-efficiently
- **SUPPORT**: Customer satisfaction is our priority. Our 24/7 help desk for network and end-user support provides rapid-response teams to fix problems quickly

### INTEGRATING TECHNOLOGY SOLUTIONS

Voice | Data | Video | Wireless | Cloud | Security

## TECHNOLOGY ROADMAPS.

Our custom technology roadmaps maximize your return on today's technologies and provide insights into the technologies that will impact your business' future.

We deliver comprehensive technology solutions that address critical needs. Keep your data secure, communications fully operational, systems upgraded, maintained and ready to support your operational functions. Our U.S. based engineering and support teams are BCS employees, not outsource staff. This gives you access to highly trained talent. BCS managed service plans include value-add services and operational systems.

Start-up and newly public companies face incredible pressures to deliver. Why spend critical time and capital to hire high-level technology staff and support engineers to manage your business technology?

BCS' experience working with R&D and manufacturing companies enables us to deliver:

- **Cost reduction.** Increase productivity, reduce operational expenses, while receiving 24/7 technology support.
- **Compliance.** BCS automation tools enable companies to meet regulatory and industry requirements for safety and quality. Value-add services give the ability to report these measures.
- **Communication system management.** Keep voice, data, video, telepresence and presentation communications secure and functional across multiple locations.
- **IT security.** Protect systems with secure, comprehensive, multilayer protocols.
- **Data safety.** Secure data via onsite and cloud based retention, managed monitoring tools, data leakage detection, and advanced encryption.

## ABOUT BCS.

BCS offers end-to-end managed technology solutions. We understand your unique operational needs and provide customized solutions. We develop long-term relationships, providing systems and technology infrastructure that scale with your growth.

We create cost-effective, seamless solutions that keep your employees, partners and customers well connected.

BCS is more than a technology solutions provider: We are a partner to help drive your business goals.
